Office Action Summary

Part of Paper No./Mail Date 20060918

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group I, claims 1-8 in the reply filed on 8/22/03 is acknowledged.
2. This application contains claims 9-17 are drawn to an invention nonelected with traverse in Paper No. 8/22/03. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. REJECTIONS WITHDRAWN

REJECTIONS REPEATED

5. All of the 103 rejections set forth in the non-final rejection of 1/9/06, pages 3-5, paragraph 8 is repeated for the reasons of record. Applicant has now included the second coating layer adhered to said first coating layer which comprises a curable

composition comprising a binder component in an organic solvent which is disclosed in Harrison (column 6, lines 58-63, column 7, lines 60-63).

NEW REJECTIONS

6. There are no new rejections.

ANSWERS TO APPLICANT'S ARGUMENTS

7. Applicant's arguments set forth in the reply of 6/27/06 have been carefully considered but are deemed unpersuasive.

Applicant has argued that the prior art does not disclose a second coating layer adhered to said first coating layer which comprises a curable composition comprising a binder component in an organic solvent. However, Harrison discloses this second layer (column 6, lines 58-63, column 7, lines 60-63).

Applicant has argued that neither Barnes nor Harrison does not disclose a polymeric binder is water soluble or water dispersible. However, Kotani discloses such a binder (column 8, line 64 through column 10, line 22).

Applicant has argued that Kotani and Barnes are non-analogous. However, both references are drawn to multilayer containers containing inorganic laminar gas barrier material comprising montmorillonite.

Conclusion
